Hi,

imam mali problemcic koji nikako da skontam sta bi moglo da bude.
pomocu skripte

```
#!/bin/bash  
USERNAME="dddddd"  
PASSWORD="dddd"  
SERVER="sss.sss.fdf.sfs"
```

```
ftp -in $SERVER  
user $USERNAME $PASSWORD
```

se trebam s linux-a spojiti na win ftp server.
kada pokrenem skriptu dobijem...

```
Connected to sss.sss.fdf.sfs  
220 Microsoft FTP Service
```

i nakon toga

```
ftp> dir  
530 Please login with USER and PASS.  
ftp: bind: Address already in use
```

e sada ja ne kontam, logiran sam i ne mogu da izlistam fajlove.

koristim pftpd u standalone rezimu...nesta sam citao na web-u o tome, za ovu gresku.
Svaka sugestija je dobro dosla

Poz
