Koristim Lucid 32b. Kako u Chrome omoguæiti javu? Ovo je instalirano:

[davor@davor-desktop](#) 00:21:59 /home/davor|\$ dpkg --get-selections | grep java

```
ca-certificates-java  install
java-common          install
javacc-doc            install
libaccess-bridge-java  install
libaccess-bridge-java-jni  install
libhsqldb-java        install
libjrexx-java         install
libjrosetta-java       install
libservlet2.5-java     install
openoffice.org-java-common  install
plasma-scriptengine-javascript  install
sun-javadb-client      install
sun-javadb-common      install
sun-javadb-javadoc     install
tzdata-java            install
```

[davor@davor-desktop](#) 00:22:06 /home/davor|\$

[davor@davor-desktop](#) 00:22:06 /home/davor|\$ dpkg --get-selections | grep jre

```
default-jre           install
default-jre-headless  install
docbook-jrefentry     install
gcj-4.4-jre           install
gcj-4.4-jre-headless  install
gcj-4.4-jre-lib        install
gcj-jre               install
gcj-jre-headless      install
icedtea-6-jre-cacao   install
libjrexx-java         install
openjdk-6-jre         install
openjdk-6-jre-headless  install
openjdk-6-jre-lib      install
openjdk-6-jre-zero     install
```

[davor@davor-desktop](#) 00:22:36 /home/davor|\$

[davor@davor-desktop](#) 00:22:36 /home/davor|\$ dpkg --get-selections | grep jdk

```
openjdk-6-jre install
openjdk-6-jre-headless install
openjdk-6-jre-lib install
openjdk-6-jre-zero install
davor@davor-desktop 00:23:00 /home/davor|$
```
